

STANDARD FEATURES

- Integrated to bender or cell control for seamless automation
- Fully programmable for positioning and tube diameter
- Fabricated with standard components

ADDITIONAL FEATURES

- Overhead, front, or side-load capability
- Tube debundler w/seam detection
- Custom fork-lift loading cells
- Implementation of safety devices

This front-load system (top) is capable of simultaneously delivering two tubes from the debundler (below) into its respective bender, the EB-110².

This EB-76 (above) is equipped with an Adaptive Motion overhead load system and an integrated punch unit. Integrated accessories are instrumental to maximize production potential.
