

CAPABILITIES

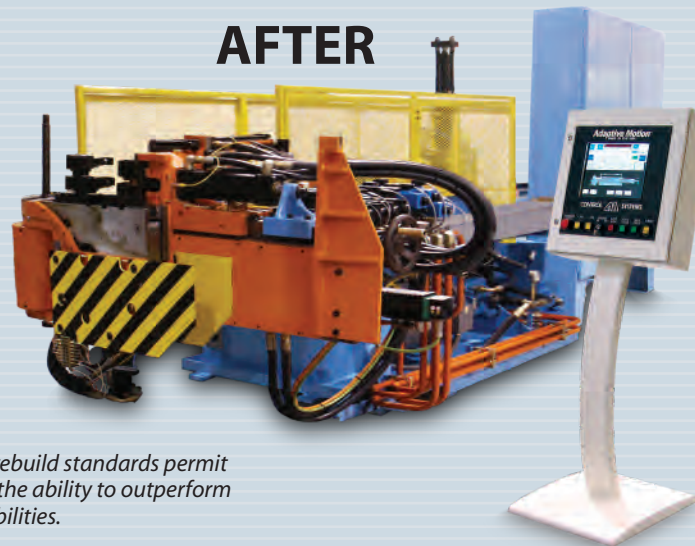

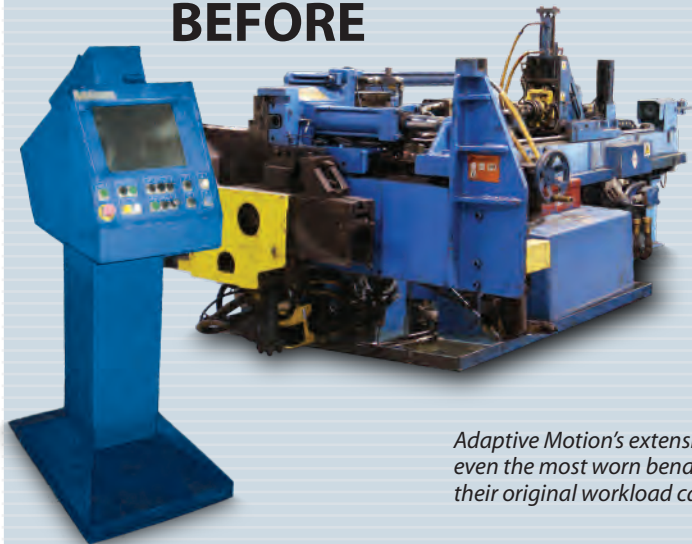

- Ability to retrofit or rebuild any make or model
- Capable of standardizing machines with off-the-shelf components
- Complete control upgrade (hardware and software)
- In-house engineering allows for custom options to be added as desired
- Complete overhaul, including new paint, electrical, pipe and much more

This European bender has been completely rebuilt and retrofitted with an Electric Push Assist® option and an Adaptive Motion Control package.

BEFORE

AFTER

Adaptive Motion's extensive rebuild standards permit even the most worn benders the ability to outperform their original workload capabilities.
